RE: Nulex, Inc.  
Sergeant Bluff, Iowa  
RCRA ID #: IAR000007310  
Extension to 90-day Storage Limit

Dear Ms. Russo:

This letter is in response to your May 19, 2015, request for a 30-day extension of time to ship hazardous wastes to a permitted treatment, storage, or disposal facility from Nulex, Inc. You described the hazardous waste as 20,000 gallons of D002 wastewater and 20,000 gallons of D006 wastewater generated as a result of a response to and cleanup after an on-site fire.

It is my understanding that the 90-day accumulation time expires May 25, 2015, but the waste hauler is unable to receive the hazardous wastewater until sometime after that but prior to June 24, 2015. The EPA has reviewed that request and determined that the situation at your facility meets the requirements of 40 CFR §262.34(b). The facility's delay in disposing the relevant hazardous wastes appears to have been caused by "unforeseen, temporary, and uncontrollable circumstances," namely the waste hauler's inability to receive the waste in a timely manner.

Pursuant to 40 CFR § 262.34(b), your request is hereby granted. You have an additional thirty days to accumulate the hazardous wastewater at your facility. If you have any questions, please contact me at 913-551-7621 or buckner.edwin@epa.gov.

Sincerely,

Edwin G. Buckner PE
